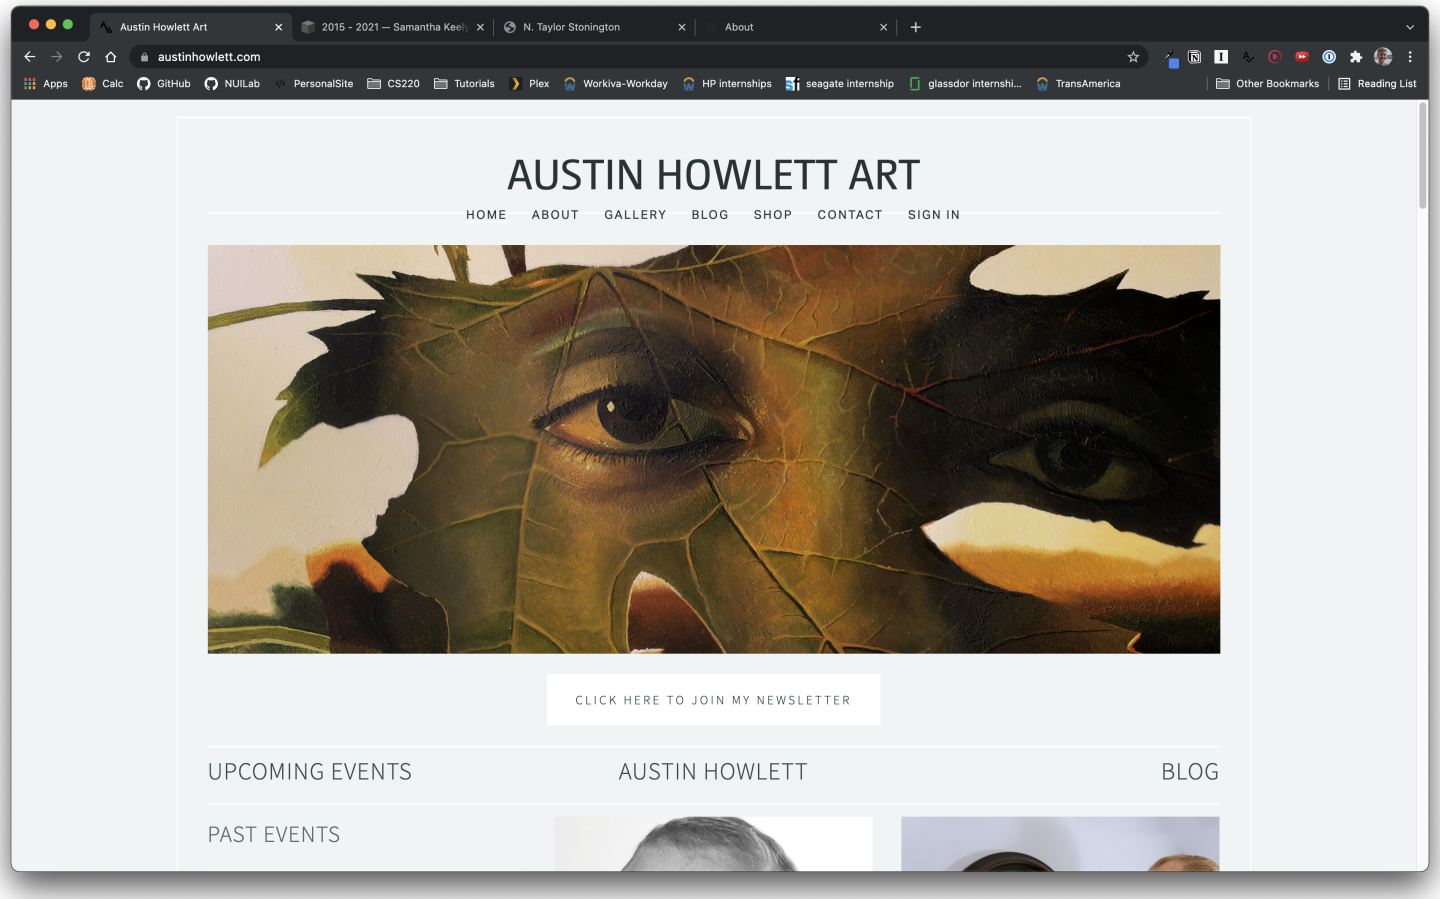
Design Inspiration and Wireframe

Site 1

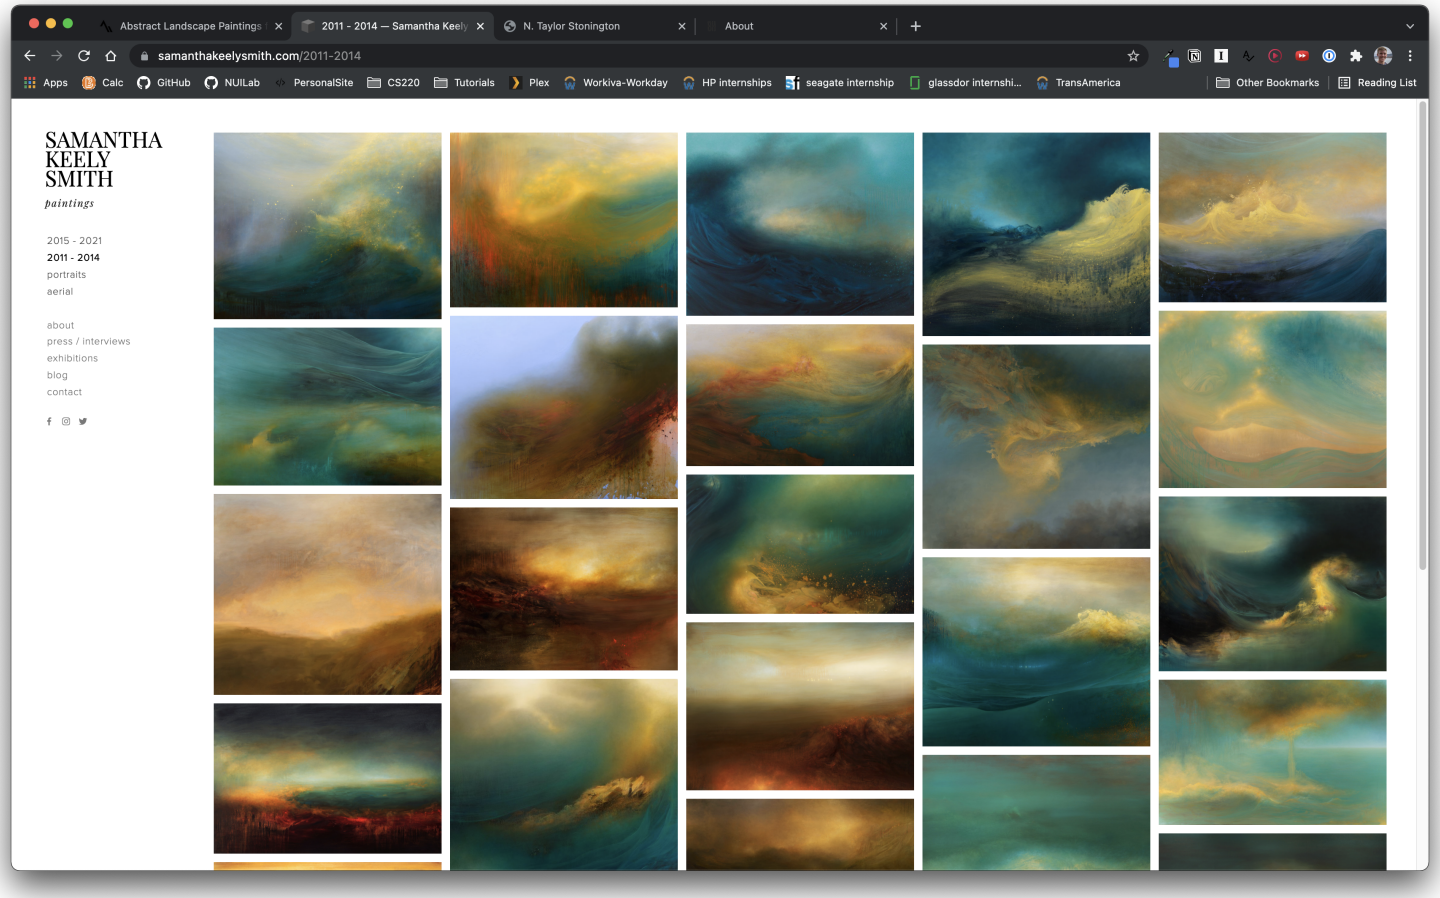


> link: https://austinhowlett.com/

Good: I like this sites simplicity, especially on the homepage as well as its use of colors. I think I also need to incorporate the sizes of the canvas in each of the photos like this site does.

Bad: I think this site could do without the white line that is framing the things on the homepage. The layout of the site does this naturally and there really is not a need for added framing lines. It also adds too much info for each image I think that my site will have minimal info for each image

Site 2

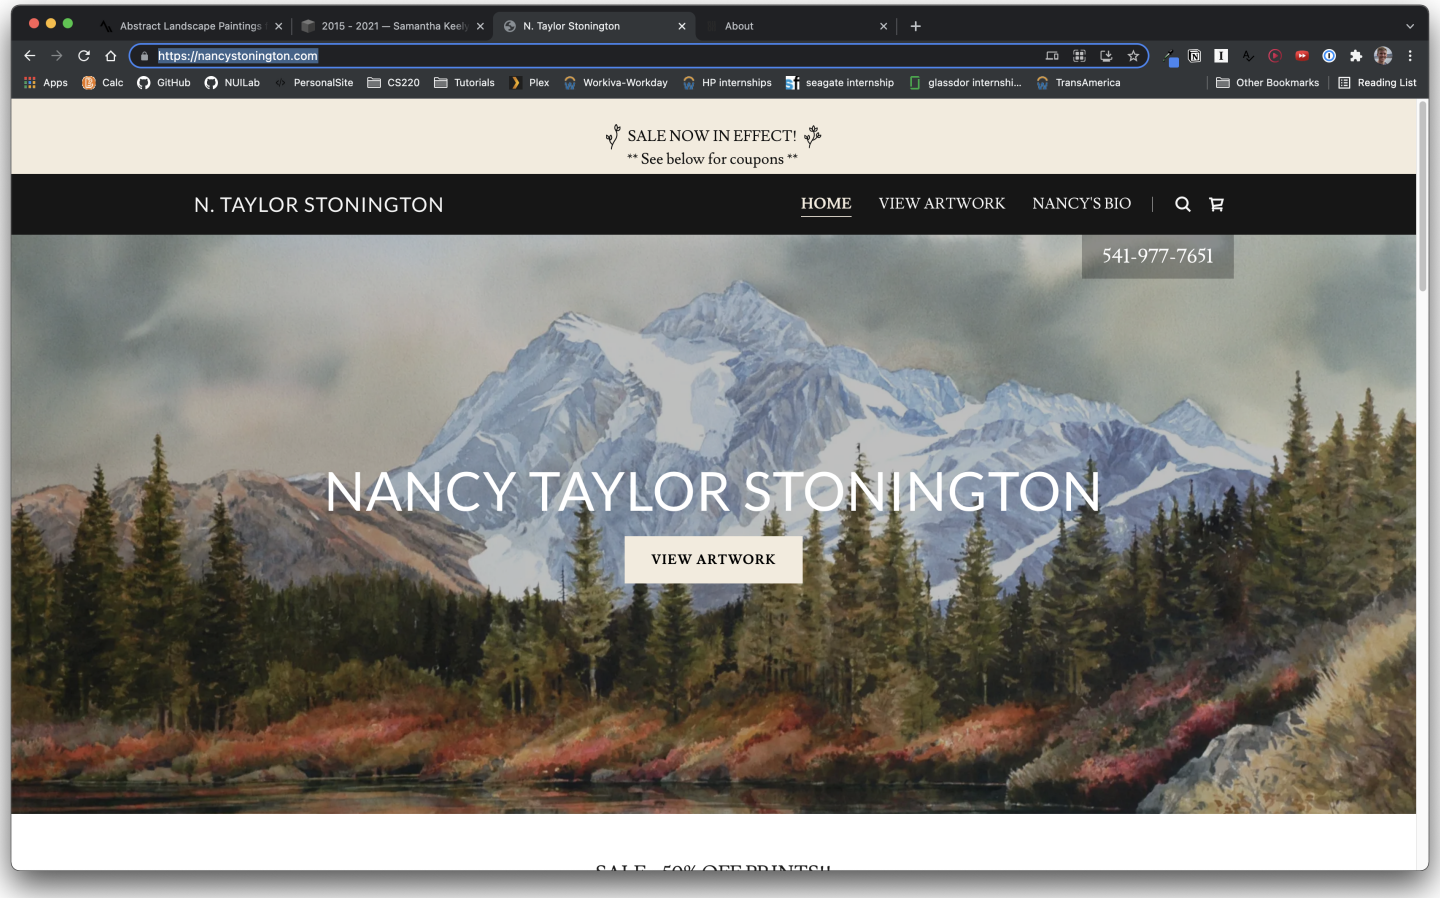


link: https://samanthakeelysmith.com/

Good: I like the organization here, the way the navigation gets put into the sidebar might be helpful for my sites navigation.

Bad: The image navigation is a bit odd on this site and i think distracts from the images

Site 3



> link: https://nancystonington.com/

Good: I like full image background here, I would need a high res image to put as the background, maybe on the homepage but I like the idea of it.

Bad: I don't love having the phone number over the image I think it takes away from the homepage and should go at the bottom
